Aspiring and motivated Software Developer with 1.9 years of experience in creating responsive and visually appealing web applications. Dedicated to enhancing user experiences through innovative design and cutting-edge technologies. Developed applications using Reactis, Nextis frameworks.

Experience

Software Developer, At Quest Sustainable Solutions; Bangalore, India — Mar 2022—Jan 2024

- Innovated and integrated responsive design elements for mobile and desktop interfaces using HTML, CSS, and JavaScript; enhanced user experience, leading to a 30% rise in session durations and a 20% boost in customer retention.
- Planned and executed website development by converting design mockups into functional web applications using React.js and Next.js.
- Utilized comprehensive debugging techniques to identify and eliminate application bugs and errors prior to publishing, ensuring high-quality deliverables.
- Implemented functionalities such as, enabling users to watch videos by clicking on timestamps, allowing the video to continue playing from the selected time, similar to YouTube, which improved user engagement and interactivity.
- Designed, and developed REST APIs using Spring Boot to add new features and improve existing functionalities, enhancing the overall performance and capabilities of the application.
- Learned and adapted quickly to new technology and software applications.
- Mastered new software and methodologies within two weeks; led to a 25% reduction in project turnaround time and increased team productivity by 15%

Personal Projects

Event Management System —

- Organiser's can add their venues in the website and see the booking analytics and accept the applications of artist.
- Customers can book an event by searching for their desired venue and can make upfront or part payments.

- Artists can join any organisation to provide their services (PhotoGraphy/ VideoGraphy/DJ) for the customers.
- Admin has the visibility of verifying new organisers and analytics of their bookings.
